LOCALLY PRODUCED ON-DEMAND

HIGHLY CUSTOMISABLE

RECYCLED & SUSTAINABLE

CREATES A NEW STYLE

Just landed on the Moon

WE AIM TO CHANGE THE WAY PEOPLE DESIGN, MANUFACTURE,
DISTRIBUTE & BUY HIGH-END DESIGN OBJECTS.

Moon is the very first product of DBE.FURNITURE (Designs By Earthlings), the disruptive brand and marketplace for sustainable luxury furniture. Our manifesto revolves around a simple yet profound question: What if an alien could fall in love with a product created by a terrestrial?

Our response is that the product should be both lovable and sustainable, while simultaneously weaving a rich and meaningful story about humanity's journey on planet Earth. Through a rigorous yet flexible set of criteria, we strive to showcase products that are not only functional, innovative, and beautiful, but also capable of transmitting humanity's essence into the cosmos.

Our products are highly customizable, locally manufactured and crafted from sustainable materials, representing a new paradigm in design. Join us in our mission to create a better world for all!

Craftmanship and Construction

Moon, a testament to luxury, was crafted with meticulous attention to detail, featuring scalability, customizability and high-quality local production. Our trusted partners are primed to bring each piece to life, ensuring that every curve and angle is crafted to perfection. Quality assurance, delivery, and installation are managed by our expert third-party furniture managers, who are all local, providing a seamless experience for each customer.

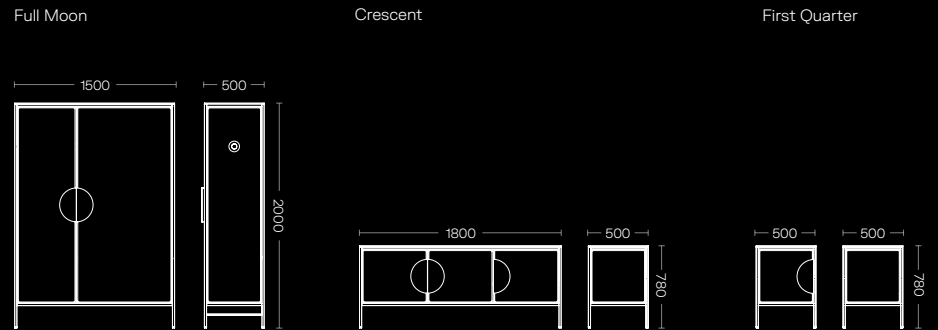

Moon's sustainable production process is a reflection of our unwavering commitment to the environment, eliminating the wastefulness of overproduction and creating a more conscientious choice. The location of manufacturing brings forth new opportunities for SMEs, enabling growth while significantly reducing CO² emissions. Moon's revolutionary design system incorporates 90% recycled and EPD verified aluminum foam, resulting in a highly durable and eco-friendly choice. Using sustainable production methods, Moon is lovable and economically conscious.

Moon is the world's first design furniture family made out of aluminum foam. With a touch of mystery and elegance, Moon offers the minimalistic extravagance which is the definition of high-end design. Aluminum foam is not only outstanding in its appeal, but it is innovative as a material too.

Collection overview

MEASUREMENTS

Moon's carrier skeleton structure is the foundation of our bespoke furniture service, which is designed to meet the unique requirements of each and every customer. From the size and shape to the materials and finish, we work closely with you to create furniture that perfectly meets your needs and exceeds your expectations.

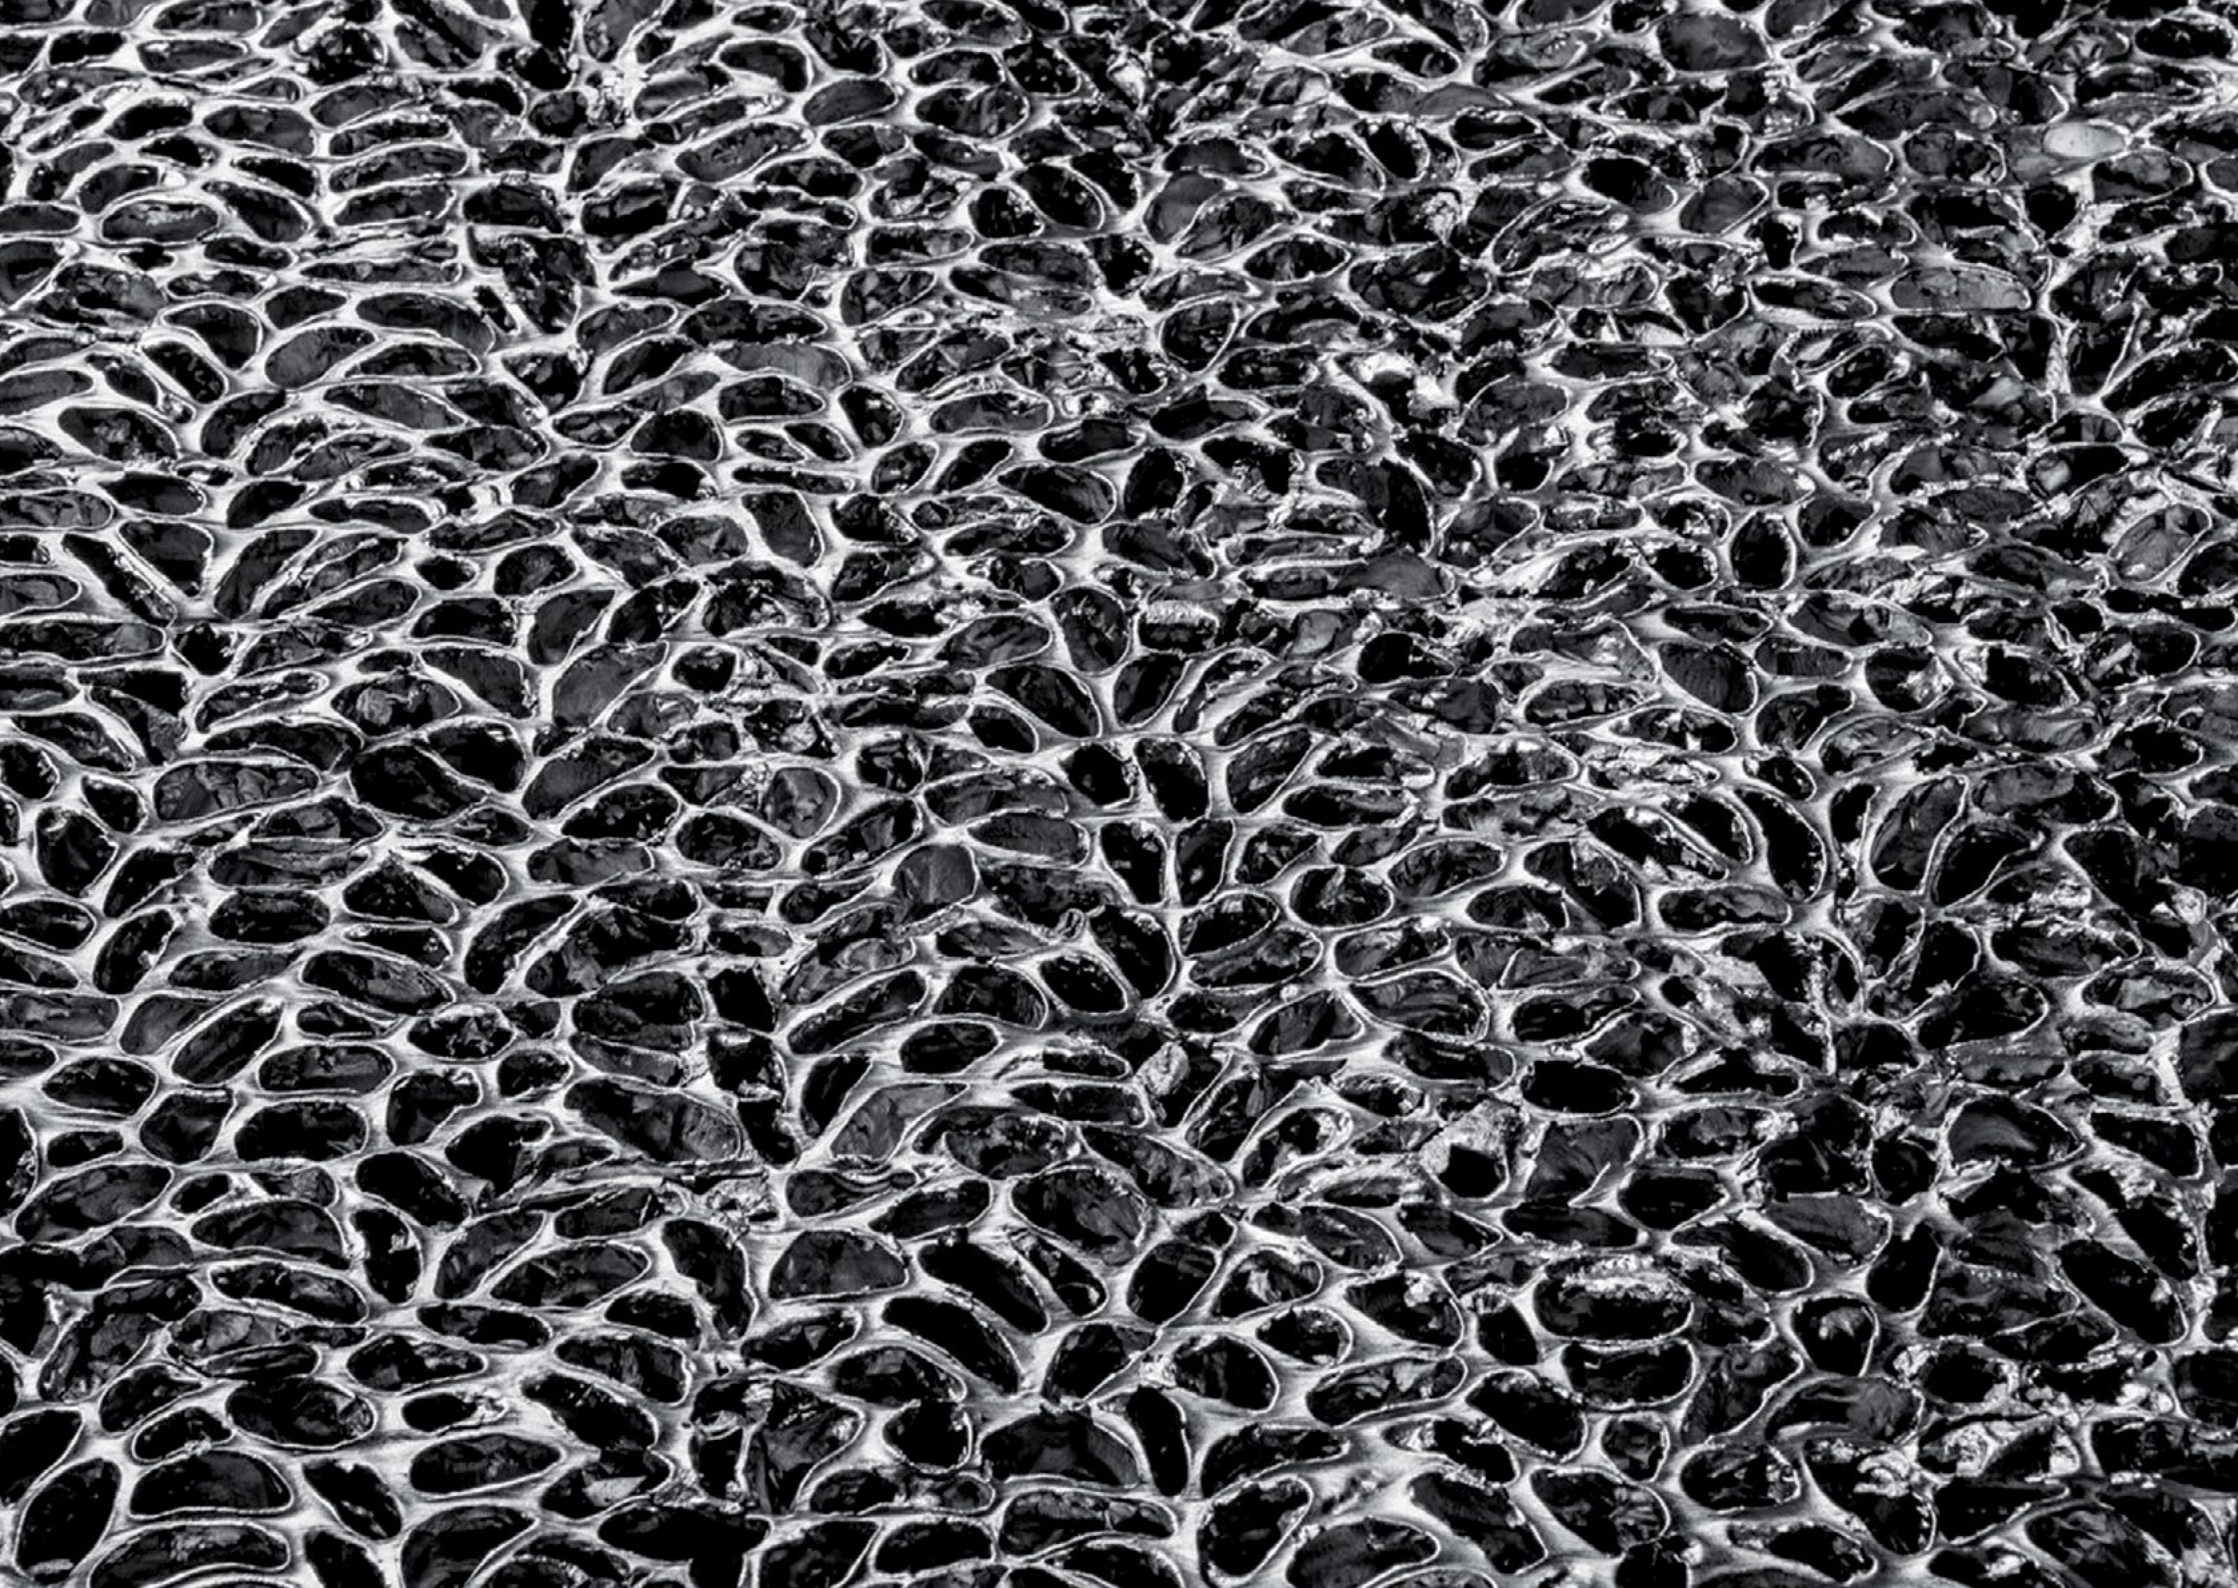

COLORS

Earth has one Moon, however, the Solar System has at least 180 other! Bring your favourite Moon from the cosmos to your home! By using 216 different RAL colour codes, you can easily find the best hue to personalize your Moon sideboard.
